SUMMARY

Computer Science undergraduate with strong problem-solving and software engineering skills, backed by 1100+ solved coding problems, industry experience, and hands-on projects in backend development, AI-powered applications, and collaborative product development.

ACADEMIC QUALIFICATIONS

B.E Computer Science Engineering

Aug 2024 – May 2028

St. Joseph's College Of Engineering (CGPA: **9.19** upto 4th Semester)

Chennai, TamilNadu

12th Std (CBSE) - Computer Science Stream

2022-2024

Alwin Memorial Public School - **96%** (**Centum in CS**)

TECHNICAL SKILLS

Programming Languages	Java, Python, SQL
Core CS Concepts	Data Structures & Algorithms, OOP, OS, DBMS, Computer Networks, Agile Methodologies
Backend	FastAPI, REST APIs
Databases	MySQL, SQLite, PostgreSQL
AI & Data	Pandas, NumPy, Scikit-learn, LangChain, RAG, ChromaDB
Developer Tools	Git, GitHub, Jupyter Notebook, Streamlit, OutSystems, Render

COMPETITIVE PROGRAMMING & ACHIEVEMENTS

- Solved **1100+** coding problems across **LeetCode - 530+**, **CodeChef - 450+**, and **GeeksforGeeks - 185+** strengthening problem-solving and algorithmic skills.
- Achieved a 2★ **CodeChef** rating, **Codeforces** Max Rating of **1035**, and **AtCoder** Rank **339**.
- Finalist — MetaCode, COMPOSIT 31st Edition by Indian Institute of Technology Kharagpur
- 2nd Place — Code Her '26 Coding Competition (*Only 2nd-year finalist among 3rd years*)

EXPERIENCE

TECH INTERN | XEBIA | Offline

Nov 2025 – Dec 2025

Chennai, TamilNadu

- Developed UI screens and user workflows for **XebKart**, an e-commerce application prototype built using OutSystems.
- Designed application entities, relationships, and CRUD operations to support business requirements.
- Collaborated in a 3-member onsite team to implement validations, test functionality, and support feature development.

PROJECTS

HireReady - ML Powered Student Placement Prediction System • [GitHub Repo](#) • [Streamlit Demo](#)

- Built an end-to-end ML web application to predict student placement readiness using academic, coding, and skill-based features.
- Developed ML pipelines with feature engineering and synthetic dataset generation using **Python** and **Scikit-learn**.
- Integrated **SQLite authentication** and an interactive dashboard to provide HireReady Scores and personalized career insights.

RoadSafetyHack-2026 — Emergency Response & Road Safety System • [GitHub Repo](#)

- Led the development and integration of **RoadSOS**, a roadside emergency assistance MVP for IIT Madras Road Safety Hackathon 2026 by planning the application architecture and coordinating module development.
- Managed the **GitHub repository**, branch workflows, and integration of UI, location, and offline support modules while resolving **merge conflicts** across a 6-member team.
- Integrated project modules, conducted **functional testing**, and supported the delivery of an offline-first application with localStorage-based caching hosted on GitHub Pages.

Groundwater Depletion Prediction System • [GitHub Repo](#) • [App Demo](#) • [Kaggle Model](#)

- Developed an end-to-end machine learning system to forecast groundwater depletion timelines using tank capacity, water level, consumption patterns, rainfall, and resident data.
- Generated synthetic datasets, performed exploratory data analysis (**EDA**), and engineered predictive features using Pandas and NumPy.
- Trained and evaluated multiple regression models, selecting a Random Forest Regressor that achieved an R^2 score of **0.967** and **96.5%** average **5-fold cross-validation** performance.
- Built and deployed a **FastAPI**-powered prediction API integrated with a responsive web dashboard, enabling real-time depletion forecasting and alert generation through **GitHub Pages** and **Render**.

CERTIFICATIONS

Fundamental Algorithms: Design and Analysis (Top 2% - Silver) | NPTEL - IIT Kharagpur | 2026

Python for Data Science (Elite - Silver) | NPTEL - IIT Madras | 2025

OCI 2025 Foundations Associate Certified | Oracle | 2026

Google Crash Course on Python | Coursera | 2024
